EXPERIENCE

Final Year Project - Virtual Trial Room

A Virtual Trial Room application using deep learning which allows a user to try on virtual clothes. The user pose and depth is tracked using the camera and virtual clothes are aligned with the tracked user. The goal of this project is to create a Virtual Trial Room application that uses augmented reality to allow users to try on different colors of clothing.

Marpur Foundation, Work From Home - Web Developer Internship

22 JANUARY 2022 - 24 FEBRUARY 2022

- Handle, build and design the static websites.
- Handled website documentations.
